

CloudBOSS[®]

Cloud-based Back Office Support System

The Engine that Powers Today's Small Businesses

What is CloudBOSS?

CloudBOSS is our suite of internet-based technologies that gives you real-time information and analytics on any desktop or mobile device. From accounting and bookkeeping to timekeeping, payroll, expense reimbursements, and more, CloudBOSS takes the time and legwork out of running a small business, freeing you to spend your time doing more of what made you successful in the first place. For an affordable, monthly fixed fee, you can completely transform the way you manage the financial aspects of your business.

Run Your Business Better

Our Back Office Support System provides you with the peace of mind that all your accounting needs are being managed by your trusted advisor. Collaborating with us through CloudBOSS may also reduce or eliminate the need for costly full-time bookkeeping staff.

CloudBOSS will transform the way you run your business:

- **Go paperless!** Banish cumbersome paper documents from your management process. Manage your documents securely online.
- **Manage accounts payable with ease.** View and pay your bills securely online.
- **Automate expense reimbursements.** Snap photos of your receipts, and CloudBOSS will automate the process of categorizing and approving expenses, saving time and legwork.
- **Take the pain out of payroll.** You can conveniently enter your payroll data online for processing. Once processed, we return paychecks, direct deposit remittances, and post employees' pay stubs to their own secure portals.
- **Get your vital signs with easy-to-read dashboard analytics.** Take in detailed visual snapshots of your business with the succinct convenience of graphic dashboard information. You'll manage your business with at-a-glance efficiency and precision.

How to Implement CloudBOSS

We'll work with you directly to make sure that your adoption of CloudBOSS is smooth and virtually effortless. Implementation begins with a thorough assessment of your business operations and the selection of the appropriate service plan. We'll also help you with technical setup (i.e. document scanner, mobile device configuration, logins, etc.).

Setup & Training—Our setup process involves an assessment of your business's accounting requirements. We'll provide instruction on how to process financial data in the CloudBOSS environment to manage your back office tasks. Our firm will also assist you in designating a point of contact (POC) in your office. We will train the POC on the process of collaborating in the cloud-based environment, including the use of tools hosted on our firm's website.

Service Plans—CloudBOSS is flexible and scalable; it's designed to meet the financial requirements of all kinds of small businesses and can be configured to provide services on a daily, monthly or annual accounting cycle, depending on the rhythm of your business operations. Core services may include:

- Managing daily transactions
- Online payroll
- Monthly reconciliations and reporting
- Tax planning and preparation
- Access to our digital platform

“CloudBOSS® empowers you to manage your business with digital dashboard precision on any desktop or mobile device. It's a secure, cloud-based way to run your small business with the portability and power today's entrepreneurs need.”
